

1 Q. (Reference 2017 GRA Volume I, page 1.10, 1.2.3) After Muskrat Falls is online what  
2 is the projected Newfoundland and Labrador open access Transmission Line Tariff?

3

4

5 A. Determining the projected open access transmission tariff to be in effect after the  
6 commissioning of the Muskrat Falls project will require the Board's decision on the  
7 cost of service functionalization of the Labrador Island Link and Labrador  
8 Transmission Assets (i.e., functionalization as transmission, generation, or some  
9 combination of both). The matter will be addressed in the Cost of Service  
10 Methodology Hearing planned for the latter portion of 2018.<sup>1</sup>

11

12 Without a decision on the approach to functionalization of these assets, Hydro  
13 cannot provide a reliable estimate of a projected transmission line tariff to be in  
14 effect after the commissioning of the Muskrat Falls Project.

---

<sup>1</sup> A discussion of this matter is provided in the Cost of Service Methodology report provided in LAB-NLH-021, Attachment 1.
