

1 Q. (Reference 2017 GRA Volume I, page 1.1) Regarding the reduced emissions
2 associated with use of Recaptured energy, are those reductions net of the
3 reductions that otherwise would have been achieved by selling the power
4 elsewhere?

5

6

7 A. The potential reduction in emissions referenced in Chapter 1 of Hydro's 2017
8 General Rate Application (page 1.10, lines 1-2) refer specifically to the potential to
9 reduce GHG emissions at the Holyrood Thermal Generating Station and do not
10 include any reductions that would have been achieved by selling the power
11 elsewhere.
