

1 Q. (Reference 2017 GRA Volume I) How many MW does the Applicant anticipate the
2 IOC expansion in Labrador will require and what impact will that have on the
3 300MW recall referenced in the Application? Has the Applicant considered the re-
4 opening of the Wabush Mines and how many MW will be required in that
5 eventuality?
6
7

8 A. Hydro was notified by IOC following the public announcement of the Wabush 3
9 Open Pit Mine Project that the project was expected to have a minimal impact on
10 the overall MW requirements for IOC. Hydro has not been provided sufficient
11 information to quantify any increased demand requirement for IOC resulting from
12 the project but expects there to be an insignificant additional requirement of the
13 available recall at Churchill Falls.
14

15 Hydro has been provided with preliminary projections of power requirements by
16 the new owners of the Wabush Mines facilities. A feasibility study is ongoing and
17 expected to be complete by the end of 2017. Hydro has not included the power and
18 energy requirements for a re-activated Wabush Mines at the present time.
