

1 Q. (Reference 2017 GRA Volume I) Please provide copies of any surveys you may have
2 forecasting demographic information in your domestic service area.

3

4

5 A. Hydro does not have copies of surveys that forecast demographic information for
6 its service territory; however, Hydro is aware of population projections for
7 Newfoundland and Labrador prepared by the provincial government,¹ and of a
8 study recently completed by the Harris Center at Memorial University.² Please note
9 that neither of these two information sources are used as direct inputs by Hydro in
10 its forecasts.
