

1 Q. (Reference response to IOC-NLH-9) Will any entity other than Hydro and Nalcor
2 have both access to the Province’s transmission system and the right to use the
3 transmission system to transport electricity in the Province? Please provide
4 examples of other entities, if any, that might fit into this category.

5
6

7 A. Yes. Once an open access transmission tariff is in place, entities will be able to apply
8 to the Newfoundland and Labrador System Operator (NLSO) to become
9 Transmission Customers to make transmission reservations, if available, on the
10 Newfoundland and Labrador Transmission System. An example of such an entity is
11 New Brunswick Energy Marketing Corporation.
