

1 Q. (Reference response to CA-NLH-34) The response indicates that Nalcor is not  
2 required to pay for transport of power and energy on the Maritime Link, but other  
3 entities might be so required. Specifically, what transmission facilities on the Island  
4 are included as part of the Maritime Link that Nalcor would be allowed to use  
5 without incurring a transmission charge and who owns these facilities?  
6  
7

8 A. The transmission facilities on the Island that are included as part of the Maritime  
9 Link that Nalcor will be allowed to use without incurring a transmission charge are:  
10 the HVdc converter station in Bottom Brook Terminal Station #2; the overhead dc  
11 line from the converter station to Cape Ray; and the electrode line from the Bottom  
12 Brook converter station to Indian Head. These transmission facilities are owned by  
13 Emera.
