

1 Q. (Summary Report – Additional Cost of Service Information, pages 12 and 13, Tables  
2 8 and 9) For comparison purposes, please provide Tables 8 and 9 with an additional  
3 column showing the original Deferral Account Scenario filed with the 2017 GRA, and  
4 the Revised Deferral Account Scenario and the Expected Supply Scenario with  
5 adjustments to reflect the Draft Settlement Agreement.  
6  
7

8 A. To respond to the question would require Hydro to complete six cost of service  
9 studies (two Test Years for each of the three scenarios) and compute customer rate  
10 impacts for each. The customer rate impacts reflecting the conclusion of the final  
11 settlement agreement (assuming one is achieved) will be provided to all parties in  
12 Hydro’s compliance filing, consistent with previous General Rate Applications  
13 (GRA). The compliance filing will be submitted following the Board’s final GRA Order  
14 after the conclusion of the hearing.  
15

16 Hydro has complied with the Board’s direction in Order no. P.U. 2(2018) by  
17 providing additional information to enable the comparison of customer rate  
18 impacts under the Revised Deferral Account Scenario and the Expected Supply  
19 Scenario. The provision of the information requested herein is unduly onerous,  
20 inconsistent with past practices of the Board, and not required for the Board to  
21 evaluate which Test Year revenue requirement approach is preferred.
