

1 Q. **Preamble:** IOC seeks to understand the rates and methodology used to
2 determine the transmission losses applicable to IOC's rates and
3 invoices.

4
5 Also, RFI IOC-NLH-019 was misinterpreted by NLH. In this RFI, "said
6 transmission loss factor" referred not to the illustration of the Island
7 loss factor, but to the transmission loss factor of the previous RFI.
8 IOC therefore restates its RFI.

9

12 *Falls (Labrador) Corporation Ltd.*, 2016 QCCS 3746 (CanLII)
13 (i) « *Hydro is advised that the availability of Recapture Energy to*
14 *Hydro has not been contended in the litigation with Hydro-*
15 *Quebec.*

16

17 Considering NLH answer to Request for information IOC-NLH-008, please explain
18 how the Québec Superior Court came to find that the availability of Recapture
19 Energy is limited to non-firm sales as it is first granted to Hydro-Québec as
20 operating reserve?

21

22

23 A. The decision of the Quebec Superior Court is under appeal. However, the question
24 does not accurately reflect the decision of the Court. The Court did not find there to
25 be any restriction on the availability of Recapture Energy to Hydro.
