

1 Q. **Re: Section 6.2, page 6.3**

2 Citation:

3 Under Hydro’s proposal, the fuel savings would be applied against the total cost of  
4 power purchases (including energy purchase costs and any delivery costs incurred  
5 to obtain off-island supply, including agency fees) and the operating and  
6 maintenance costs from Nalcor to access the LIL and LTA.

7

8 Please:

9 a) confirm that the energy purchase costs for Recapture Energy would be the  
10 0.2 cents/kWh paid by Hydro by virtue of the Power Purchase Agreement  
11 between Hydro and CF(L)Co (note 8, page 6.5); and

12 a) explain in detail

13 i. how the delivery costs and agency fees would be determined; and

14 ii. how the “operating and maintenance costs from Nalcor to access the  
15 LIL and LTA” would be determined.

16

17

18 A. Please refer to Hydro’s responses to PUB-NLH-016 and NP-NLH-004.
