

1 Q. Further to response to Request for Information NP-NLH-063:

2

3 Please restate *Table 1 – Gas Turbine Production Costs 2007 – 2017* to provide the  
4 requested information, separately, for Hardwoods and Stephenville gas turbines.

5

6

7 A. Hydro has not historically tracked the costs associated with the Hardwoods and  
8 Stephenville gas turbines separately. Prior to 2016 the costs associated with these  
9 assets, as well as other unrelated assets, have been included within the same  
10 business unit. Therefore, the costs specific to Hardwoods and Stephenville gas  
11 turbines during this period are not easily extracted.

12

13 Since 2016, the Hardwoods and Stephenville gas turbine assets have been included  
14 in the same business unit. The approximate costs for Hardwoods and Stephenville  
15 for 2016 and forecast costs for 2017 are presented in Table 1.

**Table 1 Gas Turbine Production Costs 2016 and 2017 Forecast (\$000s)**

<u>Year</u>	<u>Hardwoods</u>	<u>Stephenville</u>
2016	1,078	394
2017 Forecast	1,140	380
