

1 Q. Further to the response to Request for Information IC-NLH-122:

2

3 Attachment 1 is a copy of Nalcor Energy's June 23, 2017 project update for the
4 Muskrat Falls project. At Page 20 of 26, there are Island Interconnected Domestic
5 Rate Projections.

6

7 However, the Provincial Government has indicated it plans to keep rates at par with
8 the forecast Atlantic Canada average of 17 cents per kilowatt-hour.

9

10 How, in Hydro's view, should the Board consider this evidence in the context of
11 these Government pronouncements when evaluating the proposed Off-Island
12 Purchases Deferral Account?

13

14

15 A. Hydro considers the proposed Off-Island Purchases Deferral Account to be one
16 component of a number of rate mitigation initiatives that will be required to limit
17 the required increase in customer rates.
