

1 Q. **Reference: John T. Browne Evidence, Page 14**

2

3 JT Browne evidence indicates that *“It would be contrary to the principle of*  
4 *intergenerational equity to pass on to customers of one period benefits included in*  
5 *the Pre-commissioning Net Benefits, while a significant amount of the associated*  
6 *costs were borne by customers of a later period.”*

7

8 Given that Hydro is proposing that current customers pay the current cost of  
9 transmission facilities, please explain in detail how the principle of intergenerational  
10 equity does not require that current customers should receive the current benefit  
11 of the low cost power, including 0.2¢/kWh Recapture Power from Churchill Falls,  
12 made available via those transmission facilities?

13

14

15 A. This response has been provided by JT Browne Consulting.

16

17 Please refer to Hydro’s response to NP-NLH-265.
