

1 Q. **Reference: Supply Cost Deferrals 2015, 2016 and 2017 Application Evidence,**
2 **Appendix B, Specific Examples of the Requirement for Standby Generation.**

3

4 For each of the Avalon Reserve Charts included in Appendix B, please provide a
5 revised chart using threshold lines showing the largest actual load on an individual
6 operating unit on the Avalon throughout the period.

7

8

9 A. Hydro notes that, as described in its response to NP-NLH-311, actual unit
10 production is not related to the determination of the spinning reserve target. As
11 such, this information is not required to determine the reasonableness of Hydro's
12 dispatch of its standby generating units.

13

14 The charts noted in the question were copied from pdf attachments to Hydro's
15 Daily System Status Meeting notes. As such, it would be unduly onerous to provide
16 the detail as requested.
