

1 Q. Further to the response to PUB-NLH-074, when does Hydro expect that the costs
2 associated with the transmission of recall power to the Island Interconnected
3 system will be finalized and submitted to the Board?
4

5

6

7 A. Please refer to Hydro's responses to PUB-NLH-016 and PUB-NLH-018. The forecast
8 costs provided by Nalcor to Hydro for use of the Labrador-Island Link and the
9 Labrador Transmission Assets for the period prior to full commissioning of the
10 Muskrat Falls Project (set out in Table 1 of Hydro's response to PUB-NLH-018) are
11 the forecast costs that Hydro is using for development of the transmission tariff.
12 Please note that the proposed Off-Island Purchase Deferral Account, if approved,
will only include actual costs incurred.
