

1 Q. Please expand all tables in Appendix C of Exhibit 7 to include 2020 bill impacts, including  
2 the impact from expected RSP activities and disposition of deferral account balances.

3

4

5 A. The expansion of the tables would require additional forecasts of a number of factors,  
6 including:

7

- Inflows to Hydro's reservoirs;

8

- Hydraulic production;

9

- No. 6 fuel prices;

10

- The quantity and price of off-island power purchases;

11

- The availability of Muskrat Falls generation; and

12

- The availability of the Labrador-Island Link.

13

Due to the volume of factors and the degree of variability of possible forecasts, Hydro does

14

not believe it can provide a reasonable rate forecast for 2020 at this time.
