

- 1 **Q. Further to the response to PUB-Nalcor-071 does Newfoundland Power know of**
2 **the timelines of possible conversion from oil to electric heat for any other large**
3 **institutional or commercial facility or facilities? If so, please provide such**
4 **information.**
5
- 6 A. Newfoundland Power is not currently aware of any institutional or commercial facilities
7 planning to convert their primary space heating fuel from oil to electricity.
8
- 9 The Company conducts an annual survey of its larger institutional and commercial
10 customers to inquire of future changes in electricity usage. To date, none of the
11 respondents to the 2019 Large Customer Survey have indicated changes in load due to
12 conversion of space heating fuel.
13
- 14 Over the past 5 years, Newfoundland Power is aware of only 2 large institutional
15 facilities that have converted their oil-fired boilers from oil to electricity.
