

- 1 **Q. Assuming the Retail Transfer Option, please provide a table that indicates**
2 **Newfoundland Power’s estimates of the increase in the numbers of distribution-**
3 **related FTEs required for operating Newfoundland Hydro’s Island and Labrador**
4 **isolated diesel plant distribution systems, using two categories (combined to produce**
5 **a single value for each of): (a) craft and supervision, and (b) levels from there up to**
6 **but excluding the director level.**
7
- 8 A. Newfoundland Power has not assessed what incremental resources it would require to
9 operate distribution or customer service (i.e. retail) assets on the Labrador or Island
10 isolated systems. For more information, see response to Information Request
11 PUB-NP-084, part (c).
