

- 1 **Q. Assuming the Island Retail and Radial Transmission Transfer Option, please add to**  
2 **the table requested in PUB-Nalcor-090 the incremental resources estimated to be**  
3 **required to add 138kV lines within a loop arrangement.**  
4
- 5 A. Newfoundland Power completed an assessment of the incremental resources it would  
6 require to operate specific transmission assets of Newfoundland and Labrador Hydro  
7 (“Hydro”) on the Island Interconnected System. The *pro forma* results of this assessment  
8 are provided in response to Information Request PUB-NP-084, Attachment A. For FTE  
9 estimates in relation to all 66 kV and 138 kV transmission systems, including those  
10 within a loop arrangement, see Table 3 on Page 14.
