
1 Q. Does Newfoundland Hydro have access to any charging profiles for light duty
2 vehicle EVs in Newfoundland? If so, please provide, in Excel format, at whatever
3 level of granularity is available.

4

5

6 A. At the present time, Hydro does not have access to any charging profiles for light
7 duty vehicle EVs used in Newfoundland and Labrador. Owing to the small
8 population of EV users in the province, Hydro is cautious about drawing inferences
9 based on any available EV charging profiles that would reflect the charging profile
10 of the existing early adopters or EVs within the province. Such charging profiles may
11 not be representative of a broader population of EV users within the province.
