

1 Q. **Reference: Study, page 1**

2

3 Provide the load curve for each hour of the past year for the Labrador West transmission
4 systems for firm and interruptible service. Please provide the data in native Excel format.
5 Please provide the same for the Labrador East transmission system in a separate file.

6

7

8 A. Please refer to IOC-NLH-018, Attachment 1 for the hourly load profile curve for the
9 Labrador West transmission system and IOC-NLH-018, Attachment 2 for the hourly load
10 profile curve for the Labrador East transmission system. These curves are not broken down
11 by firm and interruptible service, but are a record of the delivered load. Newfoundland and
12 Labrador Hydro did not initiate customer interruption during this time. Please note that
13 IOC-NLH-018, Attachment 1 includes the load profile curves for both 2017 and 2018 for
14 Labrador West, as there were maintenance outages in 2018 that were captured in the data,
15 with 2017 providing a better representation of the load profile.
