

1 Q. **Reference: page 12, lines 3-6, Network Additions Policy Review.**

2

3 Please provide the reasons for not applying a Network Additions Policy to the IIS at this  
4 time.

5

6

7 A. Newfoundland and Labrador Hydro's ("Hydro") response to NP-NLH-033 describes why  
8 there is a requirement for a revised approach in dealing with network additions to serve  
9 load growth on the Labrador Interconnected System. That same response also  
10 demonstrates that the circumstances on the Island Interconnected System do not  
11 demonstrate the requirement for a revised approach at this time.

12

13 Hydro's response to PUB-NLH-055 explains that a Network Additions Policy for the Island  
14 Interconnected System is also not required in the provision of open access transmission  
15 services.

16

17 If the Board of Commissioners of Public Utilities decides that a revision to the current  
18 approach in dealing with network additions on the Island Interconnected System is  
19 required, Hydro believes the policy development should be done jointly by Newfoundland  
20 Power and Hydro.
