

- 1   **Q:**    **Quantify the amount Brattle would recommend be placed in a security deposit for**  
2           **cryptocurrency customers.**  
3
- 4    A.    As discussed in the response to LAB-PUB-006, we do not propose a specific network  
5           addition policy for cryptocurrency customers. Instead the security required for all  
6           customers would be based on the anticipated revenues from the customer over a pre-  
7           defined time period. Please refer to NLH-PUB-006 for a discussion of trade-offs as  
8           related to the amount required in security deposits versus upfront payment.
