

1 **Q. Does NP's Curtailable Service program still provide value to the system? Please**  
2 **explain.**

3  
4 A. Yes.

5  
6 The Curtailable Service Option program continues to provide value to the system, as  
7 evidenced by the 23 requests for curtailment (excluding the Curtailment Tests) over the  
8 past 5 winter seasons. The justification for the Option and the modifications that were  
9 made to it as a result of the 2014 Curtailable Service Option Review remain valid at  
10 present.<sup>1</sup> When power becomes available from Muskrat Falls, the program will be  
11 reviewed.

---

<sup>1</sup> The Curtailable Service Option Review report was filed with the Board as part of Newfoundland Power's 2016 General Rate Application.
