

- 1 **Q. (PUB-NP-12) The response discusses various means for mitigating customer rate**
2 **impacts owing to Muskrat Falls. Would developing new markets for power within**
3 **the Province have a similar effect with respect to rate mitigation as selling surplus**
4 **power on the open market?**
5
- 6 A. Yes, development of new markets for power within the province would have a similar
7 effect with respect to rate mitigation as selling surplus power on the open market.
8
- 9 Newfoundland Power observes that export markets for selling surplus power already
10 exist whereas new markets within the province would have to be developed.
