

- 1 **Q. a) Please provide Newfoundland Power's policy on capitalizing “unavoidable costs”**  
2 **that are directly attributable to construction activity (i.e., costs that would have**  
3 **been avoided if the asset had not been constructed; for example, mobile gas turbine**  
4 **costs that are capitalized in a capital job).**  
5  
6 **b) Please provide a listing of “unavoidable costs” that are included in the 2020**  
7 **capital budget and a five-year history of actual capitalized unavoidable costs (2014–**  
8 **2018), including a description of the unavoidable cost, the dollar amount of the**  
9 **unavoidable cost, and the corresponding capital project.”**  
10  
11 **A.** Newfoundland Power’s capitalization practices conform to accounting principles  
12 generally accepted in the United States (“U.S. GAAP”), as well as industry best  
13 practices.<sup>1</sup> Costs which are permissible as a capital expenditure under U.S. GAAP are  
14 described in the response to Request for Information NLH-NP-021.  
15  
16 U.S. GAAP does not use the term “unavoidable costs.” As such, the Company does not  
17 track costs by the term “unavoidable” and it is not possible to provide the requested  
18 detail.

---

<sup>1</sup> Additional guidance is provided in the Federal Energy Regulatory Commission (“FERC”) Uniform System of Accounts, which utilizes U.S. GAAP, but is specific to the utility industry and widely used throughout North America. This standard more clearly defines the direct and indirect overhead costs eligible for capitalization in electric plant accounts.
