

1 Q. Please provide all studies pertaining to the costs of maintaining these stations and who will bear
2 the expenses relating to maintaining same?

3

4

5 A. Newfoundland and Labrador Hydro (“Hydro”) has no formal studies which pertain to the
6 maintenance of electric vehicle charging stations.

7 As noted in the evidence to Hydro’s application, “Hydro also proposes to charge operating and
8 maintenance costs, and credit revenues obtained through the provision of charging services to
9 the ECDM Deferral Account to partially offset the program costs.”¹
