

1 Q. On page 2 of the Application [paragraph 5] Hydro notes “[i]n consultation with the provincial  
2 government, the Utilities have developed a comprehensive and coordinated plan for the delivery  
3 of customer CDM and electrification programs for the period of 2021–2025 (“2021 Plan”). The  
4 2021 Plan is included with this application as Schedule 3.”

5 Is Hydro requesting the Board to review and approve the 2021 Plan? If so, please indicate the  
6 scope and scale of activities expected to be authorized by this approval (i.e., is it all programs  
7 noted through 2025).

8

9

10 A. As noted and further discussed in Newfoundland and Labrador Hydro’s (“Hydro”) response to  
11 IIC-NLH-001, Hydro is not seeking approval of specific electrification, conservation and demand  
12 management programs; rather, Hydro is seeking approval of the economic evaluation of  
13 customer electrification programs by use of a modified Total Resource Cost (“mTRC”) test.
