

1 Q. Please provide the underlining assumptions for incremental revenues (including whether the
2 baseline forecast or high forecast was used for number of EVs, energy/demand sales, rates and
3 marginal costs) and incremental system costs by year used in Appendix A of Schedule 1.

4
5
6 A. Newfoundland and Labrador Hydro (“Hydro”) notes that Appendix A of Schedule 1 represents
7 the electrification impacts associated with Hydro’s Rural customers only. The Dunskey
8 Conservation Potential Study scenarios (baseline, high, etc.) represent the potential for the
9 entire Island Interconnected System, including customers of Newfoundland Power Inc.

10 Please refer to Hydro’s response to PUB-NLH-043 for the rates assumptions used in this analysis.
11 Please refer to Hydro’s response to IIC-NLH-028 for marginal system costs used in this analysis.
