

1 Q. On page 5, paragraph 22(ii) of the Application, Hydro is seeking approval of the ECDM Deferral
2 Account to provide for the deferral of costs related to the implementation of Hydro’s ECDM
3 programs for all systems, including the CDM programs for the Labrador Interconnected system.
4 Please confirm if the electrification programs are being provided for all systems, including
5 isolated systems. If so, please explain why all systems should be included, how it benefits each
6 system, how the electrification of isolated systems would impact the rural deficit and how the
7 costs relating to these systems will be recovered.

9

10 A. Newfoundland and Labrador Hydro (“Hydro”) is only seeking to offer electrification
11 programming on the Island Interconnected System. Under Hydro’s 2021–2025 Electrification,
12 Conservation and Demand Management Plan, no electrification programs will be offered to
13 customers in Hydro’s isolated systems.
