

1 Q. Hydro will contribute the funds necessary for two of the chargers in Labrador and Nalcor Energy
2 will contribute the funds for the Churchill Falls location.

3 a) Please confirm that the contributions towards the capital costs of the chargers will not
4 impact customer rates on any of the systems?

5 b) Please confirm whether the operating and maintenance costs, net of revenue, for the
6 charging stations located in Labrador will be recovered from customers. If so, which
7 customer groups will be responsible for the recovery of these costs?

8

9

10 A. a) It is confirmed the cost incurred for the two chargers for the Churchill Fall location will not
11 impact customer rates on any of the systems.

12 b) The operating and maintenance costs, net of revenue, for the charging stations located in
13 Labrador will not be recovered from customers at this time. If future evaluation determines
14 that costs associated with supporting electrification in Labrador are beneficial to customers
15 through the provision of least-cost, reliable service over the long term, Newfoundland and
16 Labrador Hydro would then apply to the Board of Commissioners of Public Utilities for
17 approval of recovery of future costs to support electrification.
