

1 Q. In several areas of the revised application, Hydro has added the language that the project meets
2 its mandate to provide “reliable service at least cost, in an environmentally responsible manner”
3 (see, for example, paragraph 19 of the revised application).

4 Please provide any justification and rationale for how the proposed regional diesel plant is
5 environmentally responsible, as well as any analysis that was completed to reach this
6 conclusion.

7

8

9 A. Please refer to Newfoundland and Labrador Hydro’s response to PUB-NLH-067 of this
10 proceeding.
