

1 Q. **Reference Application Rev. 1, Volume 2, Upgrade Distributed Control System Hardware –**
2 **Holyrood, page 6**

3 a. Please quantify the risk, reliability and rate impacts on customers if this project were
4 deferred by a year. With respect to risk, please identify the probability of failure and the
5 consequences of failure. In effect, what is the trade-off between cost to ratepayers, system
6 reliability and risk?

7 b. What is the expected life of the new hardware?

8 c. Will Schneider be allowed to bid on any subsequent parts of the project?

9 d. Please provide copies of all documentation between Schneider and Hydro over the course of
10 the Schneider study.

11

12

13 A

14 a. The Upgrade Distributed Control System Hardware – Holyrood project is proposed to
15 execute required sustaining capital works for Newfoundland and Labrador Hydro's ("Hydro")
16 existing assets so as to operate, maintain, and renew its infrastructure to achieve required
17 service standards and to optimize the cost of electricity in an environmentally responsible
18 and safe manner.

19 Hydro uses its internal expertise supplemented, when required, by consultants, original
20 equipment manufacturers, and readily available industry information to determine, in
21 Hydro's opinion, the appropriate timing of capital work to maintain service standards and to
22 optimize costs. As noted in the information presented by Hydro, deferral of this project is
23 not a viable option as it will increase the risk of failures. Hydro believes, based upon its
24 knowledge at this time, deferral would be imprudent. The detail requested for
25 quantification of risk and reliability impact requires analysis capability which at this time
26 Hydro does not have within its Asset Management System.

1 With respect to rate impact, Hydro does not compute rate impact on an individual project
2 basis. Hydro’s pro forma computation of revenue requirement impact on a total capital
3 budget basis was included in its 2021 Capital Projects Overview.

4 **b.** The soon to be obsolete FCP270 is proposed to be replaced by the FCP280 processor. On
5 page 3 of the Foxboro DCS, Foxboro Evo™ and I/A Series® Lifecycle Product Phase Listing,
6 included as CA-NLH-065, Attachment 1, the FCP280 controller is listed in the preferred
7 phase of the product life cycle. There are no dates identified for transition to the remaining
8 four phases of the product life cycle. The FCP270 life cycle indicates an 18-year life cycle. A
9 similar life cycle is expected for the FCP280.

10 The H92 computer stations and H90 servers will be replaced with latest offering. On page 15
11 of CA-NLH-065, Attachment 1, the latest version of the H92 computer stations and H90
12 servers are listed in the preferred phase of the product life cycle. There are no dates
13 identified for transition to the remaining four phases of the product life cycle. The previous
14 H92 and H90 stations life cycle indicates a 6-year life cycle. A similar life cycle is expected for
15 the latest offering.

16 The switches will be replaced with latest offering. On page 10 and 11 of CA-NLH-065,
17 Attachment 1, the latest version is listed in the preferred phase of the product life cycle.
18 There are no dates identified for transition to the remaining four phases of the product life
19 cycle. The previous switch life cycle indicates a 10-year life cycle. A similar life cycle is
20 expected for the latest switch offering.

21 **c.** At the present time, there is no plan for future work outside of the scope of this project.

22 **d.** Schneider Electric is the original equipment manufacturer and was contracted in 2018 to
23 provide an “Annual Lifecycle Assessment Summary and Upgrade Planning Roadmap”¹ that
24 outlines the life cycle phases of the distributed control system hardware installed at the
25 Holyrood Thermal Generating Station. Hydro utilized this report to determine the proposed
26 course of action, as detailed in its 2021 Capital Budget Application. It is Hydro’s position that

¹ “2021 Capital Budget Application,” Newfoundland and Labrador Hydro, rev 1, August 7, 2020 (originally filed August 4, 2020), vol II, tab 8, att 1.

1 the requested information is not necessary for a satisfactory understanding of the matters
2 before the Board of Commissioners of Public Utilities.

Foxboro DCS, Foxboro EvoTM, I/A Series[®] System Product Phase Listing

August 2020

Foxboro DCS, Foxboro Evo™ and I/A Series® Lifecycle Product Phase Listing

Introduction

This document provides a listing of the major Foxboro DCS, Foxboro Evo & I/A Series products and where they are in their lifecycle.

This is organized by Phase and the products are broken into hardware and software subsystem categories. The I/A Series Lifecycle Support Policy includes five defined support phases – Preferred, Available, Mature, LifeTime and Obsolete Phases. This document lists the lifecycle phase of each major Foxboro DCS, Foxboro Evo & I/A Series component and when products (except Preferred) are expected to transition to the next phase.

Products in the **Preferred Phase** are Standard Hardware that are the most recent products available in their functional area. Products in this category are actively being promoted, enhanced, produced and sold. Products in the **Available Phase** represent Standard Products that are available for sale and are being produced, but are no longer the Preferred Product offering. Typically, these products are sold for expansions, not for new installations. This designation also serves as early notice that the product will be withdrawn from sale.

The **Mature Phase** begins when the product is withdrawn from sale. Even though the product is withdrawn, we are committed to ensure that a comprehensive, clearly defined support program is firmly in place. The length of time that a Standard Product remains in the Mature Phase varies, based on product type, and is directly related to the degree of disruption to our Customers' processes – the more difficult it is to remove, the longer the duration.

LifeTime Phase begins at the end of the predefined Mature Phase and products will be supported on a best effort basis for as long as we can provide a quality repair or replacement. However, at some point, we may no longer be able to repair or replace a given product. At that time, a Customer Notification is pushed proactively to our registered users identifying the product as potentially Obsolete.

Obsolete Phase Products are typically identified when, after our best effort to support, maintain, repair and/or offer MEP exchanges, we find that we can no longer provide certain products. Every effort is made to provide at least one year's notice before it is anticipated that there will no longer be a supply of replacement or repairable modules.

For more details, please refer to [the Lifecycle Management Policy document](#) published on our Global Customer Support web site.

Note: If there is a conflict between this document and Schneider Electric Terms and Conditions of Sale for Foxboro Products – Form 2547G, the latter will take precedence.

Product Number	Description	PREFERRED (see comment) Date=Product Introduction	AVAILABLE (see comment) Date=Transition to Available	MATURE (see comment) Date=Withdrawn from Sale	LIFE TIME (see comment) Date=Transition to Lifetime	Projected obsolete Date=No longer Repairable
P0973JP	8-Port Copper / 8-Port Fiber Managed Switch		Feb-11	Jul-16	Apr-19	Feb-23
P0973HA	24 SFP Port Uplink Switch		Feb-10	Sep-16		
P0973FQ	Uplink Expansion Module With Six Port Slots		Feb-09	Jun-17		
P0973FT	MGBIC module, 1000Base-LX, LC port, 80km, SMF		Oct-08	Jun-15	Jun-20	
P0973FU	Industrial MGBIC 1000Base-LX, LC port, 80km, SMF		Oct-08	Apr-15	Apr-20	
P0973GA	Industrial E'Net Switch; 24-100BaseTX, RJ45 ports		Dec-07	Dec-16	Dec-21	
P0973GB	Industrial Enet switch w/eight 100BaseFX, LC ports		Dec-07	Apr-14	Apr-19	
P0973GC	Industrial Enet module w/four 100BaseFX, LC ports		Dec-07	Dec-16	Dec-21	
P0973GD	Industrial Enet module w/eight 100BaseFX, LC ports		Dec-07	Dec-16	Dec-21	
P0973GH	1000Base-LX w/LC GBIC module for P0973GB switch		Dec-07			
P0973GJ	1000Base-SX w/LC GBIC module for P0973GB switch		Dec-07	Dec-16	Dec-21	
P0973HB	Industrial E'Net Switch;16-100BaseFX, LC MMF ports		Dec-07	Dec-16	Dec-21	
P0973HC	Industrial E'Net Sw:8-100BaseFX &12-100BaseTX ports		Dec-07	Dec-16	Dec-21	
P0973QM	8-port, unmanaged, 10/100/1G,RJ-45 Ethernet switch		Nov-07	Mar-15		
P0973BQ	Chassis Ethernet Switch: 48 100Base-TX RJ45 Ports		Dec-06	Sep-11	Jun-17	
P0973BR	Chassis Ethernet Switch: 48 100Base-FX MTRJ Ports		Dec-06	Oct-11	Sep-17	
P0973BS	E-Series Chassis to N-Series Chassis Bridge Module		Dec-06	Jun-12	Jun-17	
P0973BT	Chassis Ethernet Switch: 18 1000Base-X GBIC Ports		Dec-06	Sep-11	Jun-17	
P0973BX	6-Port Single Mode Fiber Optic Hub w/ST Connectors		Dec-06	Apr-15	Apr-20	
P0973BL	24 SFP Port Switch superseded by P0973HA		Dec-06	Feb-10	Feb-15	
P0973BM	8-Bay Power Supply Chassis for P0973BH/BJ/BK/BL		Aug-06	Dec-15	Dec-20	
P0973BN	Two-Bay Power Supply Chassis for P0973BH/BJ/BK/BL		Aug-06	Aug-15	Aug-20	
P0973BP	Redundant Pwr Supply for P0973BH/BJ/BK/BL Switches		Aug-06	Dec-15	Dec-20	
P0973BH	Copper E'net Switch w/24 RJ-45 Ports &Uplink Ports		Aug-06	Apr-10	Sep-16	
P0973BJ	Fiber E'net Switch w/24 MT-RJ Ports & Uplink Ports		Aug-06	Oct-09	Apr-16	
P0973BK	8 RJ45 & 8 MTRJ FO Port E'net Switch &Uplink Ports		Aug-06	Apr-10	Apr-16	
P0973AR	Matrix N1, 1 Slot, Chassis w/Power Supply & Fans		Jan-06	Sep-11	Jun-17	
P0973AS	Matrix N3 System Chassis & Fans, Needs P0973AU PS		Jan-06	Sep-11	Jun-17	
P0973AU	Matrix N3 System Chassis Power Supply		Jan-06	Sep-11	Jun-17	
P0972VA	Address Translation Station;Mesh/Nodebus Connect		Dec-05		Dec-20	Feb-28
P0972VE	Chassis For Modular Ethernet Switch System		May-05	Sep-11	Jun-17	
P0972YG	Chassis Blade: 48 10/100Base-TX RJ-45 Ports		May-05	Jun-12	Jun-17

Product Number	Description
P0972MH	24 Port, 10/100BaseTX Ethernet Switch
P0972MJ	16 Port 100BaseFX Fast Ethernet Switch
P0972PF	Redundant Control Network Interface (RCNI), DIN
P0972PP	Nodebus Control Network Interface (NCNI)
P0972QM	Redundant Control Network Interface (RCNI), Table
P0972ST	2 Port Gigabit ENET Uplink Module For P0972MH
P0972SU	2 Slot Gbit ENET Uplink Mod For Port I/F Modules
P0972SV	2 Port Gbit ENET Uplink Module For Copper w/RJ45
P0972MZ	8 Port Unmanaged 10/100BaseTX Ethernet Switch
P0972LL	Uplink Module For 24-Port Switch
P0971VV	DNBT Module
P0970BC	Dual Nodebus Interface Module (DNBI)
P0970EJ	Dual Nodebus Extended Module (DNBX)
P0400ZG	Nodebus Interface
P0700WB	Nodebus Extender

Foxboro DCS Peripherals

RH103DB	40 inch LCD overview monitor
RH103DD	External USB Backup Hard Drive
RH101CR	Compact FPS480-24 Power Supply, AC/DC Input
P0924WV	USB Annunciator/Numeric Keyboard
P0928GG	2 TB External USB Backup Hard Drive
P0923VY	19" TT w/o Shield
P0923VZ	19" TT Module w/o Shield
P0922YC	Power Supply, FPS 400-24/24
P0922YU	Power Supply, FPS 400-24

Foxboro DCS Unix Workstations

P0973DS	P82-Ultra25 Workstation Style A, Rev A,B,C
P0972ZT	P81-SB1500S Workstation Style B Rev A
P0972XN	P81-SB1500 Workstation Style A Rev A,B
P0972QV	P79 Workstation Style A, Rev A, Style B, Rev A,B.

Product Number	Description
P0902MX	HP Ink-Jet Printer For PW's (220 Vac)
P0902MY	HP Ink-Jet Printer For PW's (240 Vac)
P0902ND	HP Ink-Jet Printer For PW's (100 Vac)
P0700ZU	Color Ink-Jet Printer - 120 Vac
P0700ZV	Color Ink-Jet Printer - 220 Vac
P0901EN	Dot-Matrix Printer 132, Color - 120 Vac
P0901EP	Dot-Matrix Printer 132, Color - 220/240 Vac
P0901ET	Dot-Matrix Printer 80, Color - 120 Vac
P0901EU	Dot-Matrix Printer 80, Color - 220/240 Vac
P0901EX	Color Ink-Jet Printer - 100 Vac
P0901EY	Color Ink-Jet Printer - 240 Vac
P0500ZA	Dot-Matrix Printer 80, B/W - 120 Vac
P0500ZB	Dot-Matrix Printer 80, B/W - 220 Vac
P0500ZC	Dot-Matrix Printer 80, B/W - 240 Vac
P0500ZK	Dot-Matrix Printer 80, Color - 120 Vac
P0500ZL	Dot-Matrix Printer 132, Color - 120 Vac
P0500ZM	Dot-Matrix Printer 132, Color - 220/240 Vac
P0500ZN	Dot-Matrix Printer 80, Color - 220/240 Vac
P0500ZP	Terminal, VT100 Compatible - 120 Vac
P0500ZQ	Terminal, VT100 Compatible - 220 Vac
