¹ Financing charges accrued at the 2024 short-term cost of borrowing of 5.03%. In December, finance costs will be tuned up to reflect the actual short-term cost of borrowing for 2025.

² As per Order in Council OC2024-062 dated May 7, 2024, Newfoundland and Labrador Hydro ("Hydro") has been directed by the Government of Newfoundland and Labrador ("Government") to use its own sources of rate mitigation and accordingly, transferred \$441.0 million of funding to its Regulated operations. The \$441.0 million includes \$90.6 million of rate mitigation funding related to the retirement of the 2023 Supply Cost Variance Deferral Account of \$271 million over the 2024 to 2026 period.

³ In 2022, as part of the Government's rate mitigation plan, Hydro, the Government and the Government of Canada signed term sheets enabling access, upon commissioning of the Labrador-island Link ("LL"), to a \$1.0 billion investment by the Government of Canada in the LL in the form of a convertible debenture. In August 2025, funding was received by LIL (2023) Limited Partnership, and transferred to Hydro for the purpose of rate mitigation, reducing the balance in the Supply Cost Variance Deferral Account.

⁴ As per Order No. P.U. 21(2025), the Board of Commissioners of Public Utilities ("Board") approved a Project Cost Recovery Rider of 1.652 cents per kWh effective July 1, 2025.

⁵ As per Order No. P.U. 7(2025), the Board approved a Project Cost Recovery Rider of 1.384 cents per kWh effective January 1, 2025 and, in Order No. P.U. 28(2025), the Board approved a Project Cost Recovery Rider of 1.652 cents per kWh effective July 1, 2025.

⁶ Hollyrood Thermal Generating Station ("Hollyrood TGS").

⁷ Island Interconnected System ("IS").

⁸ As per Order No. P.U. 21(2025), the Board approved the transfer of the \$5,711,679 credit balance, as of December 31, 2023, in the Hydraulic Resources Optimization Deferral Account to the Net Revenue from Exports component within the Supply Cost Variance Deferral Account.

⁹ As per Order No. P.U. 1(2025), the Board approved a wholesale rate, effective as of January 1, 2025, to be charged to Utility of 9.698 cents per kWh for winter months of December to March and 3.354 cents per kWh for the non-winter months of April to November.

¹⁰ In October 2025, Hydro sold 211,700 Greenhouse Gas Performance Credits within the provinces for \$15.8 million.

¹ The Rural Rate Alteration is allocated between Utility and Labrador Interconnected customers in the same proportion that the rural deficit was allocated in the approved 2019 Cost of Service Study, which is 96.1% and 3.9%, respectively. The Labrador Interconnected amount is then removed from the plan and written off to net income (loss).

The only transactions posted to the Utility's Customer Balance are Newfoundland Power's allocation of Rural Rate Alteration and associated interest until further approval is obtained from the Board.
