

1 Q. **Reference: Application**

2 In 2020 what was the capital cost per megawatt of Hydro's thermal capacity and its production
3 cost per kilowatt hour of thermal energy?

4

5

6 A. The 2020 capital cost per megawatt of Newfoundland and Labrador Hydro's ("Hydro") thermal
7 capacity¹ was \$8,978/MW. The 2020 production cost per kilowatt hour of thermal energy was
8 \$0.144/kWh. The 2020 capital cost per megawatt of Hydro's standby thermal capacity² was
9 \$7,849/MW and the 2020 production cost per kilowatt hour of standby thermal energy was
10 \$0.337/kWh.

¹ Reflective of the Holyrood Thermal Generating Station.

² Reflective of Hydro's gas turbine and interconnected diesel generation fleet.
