

1 **Q. Re: Non-Firm Rate Presentation, page 23**

2 Citation:

3 Since OC, Hydro has had an additional cryptocurrency operation requesting non-firm
4 service; this applicant initially applied for firm service only. Given the change in supply
5 availability, Hydro believes the request is not unreasonable.

6 Has Hydro made any representations to this customer, or to other customers, regarding the
7 likely extent of availability of non-firm energy over the coming years? If so, please summarize
8 the representations that have been made.

9

10

11 A. Newfoundland and Labrador Hydro (“Hydro”) has not made any specific representations;
12 however, during conversations with applicants over the past year, Hydro has provided
13 illustrative information about non-firm allocations and indicated that any changes to firm load
14 requirements will have an impact to the amount of non-firm energy available.
