

1 Q. **Reference: Application, Holyrood Thermal Generating Station Overview, Chart 1**

2 The chart shows capital expenditures in 2023 of \$27.8 million. At this point, is there any way  
3 Hydro can avoid these expenditures in 2023? If so, please explain.

4

5

6 A. The expenditures included in the 2023 Capital Budget Application are confirmed to be required  
7 for the continued reliable operation of the Holyrood Thermal Generating Station (“Holyrood  
8 TGS”) until March 2024.<sup>1</sup>

---

<sup>1</sup> In its correspondence, “Reliability and Resource Adequacy Study Review – Additional Considerations of the Labrador-Island Link Reliability Assessment and Outcomes of the Failure Investigation Findings – Additional Information,” Newfoundland and Labrador Hydro, February 4, 2022, Hydro committed to having the Holyrood TGS available for full generation until March 31, 2024.
