

1 Q. Has, or is Hydro planning to, make upgrades to its transmission and distribution facilities in  
2 response to global warming and its impact on localized weather conditions?

3

4

5 A. Newfoundland and Labrador Hydro (“Hydro”) currently has no plans to upgrade its transmission  
6 or distribution facilities in response to any specific climate change issue or its impact on  
7 localized weather conditions. Hydro will continue to regularly monitor weather patterns and  
8 asset reliability for any emerging trends that may result in potential asset upgrades in the  
9 future.
