

1 Q. Re: Pre-filed Testimony of Larry Brockman, page 16, Recommendations.
2 With regard to the Pre-filed Testimony of Larry Brockman (page 16,
3 Recommendations), please provide a 2013 COS incorporating the following: (a)
4 a fully weather adjusted load forecast for NP, including peak demand and sales
5 (per Brockman recommendation #1); (b) a normalized Holyrood capacity factor
6 of 28% (per Brockman recommendation #2); (c) weather normalized Rural
7 system loads (per Brockman recommendation #3) and (d) a normalized load
8 factor for Vale and Praxair (as per IC-NLH-140) (per Brockman recommendation
9 #4). Please ensure that peak demand adjustments are incorporated to reflect
10 revised annual peaks for the purposes of selecting the peak month for 1CP
11 allocation.

12
13
14 A. The requested 2013 adjusted Cost of Service Study is not available. As stated in
15 response to Request for Information IC-NLH-012, Hydro does not weather adjust its
16 actual energy sales to Newfoundland Power. Also, Hydro does not normalize its
17 Rural system loads.

18
19 In response to Request for Information NP-NLH-271, Hydro provided a 2013 Test
20 Year Pro-forma Cost of Service Study based upon the 2014 load forecast. This
21 response reflects forecast peaks and sales to Newfoundland Power and Hydro Rural
22 customers for 2014. This response addresses elements (a) and (c) of the above
23 request for information.
