- 2015. We were given some information in an 10
- 11 RFI that salaries over that period had
- increased, gross salaries, on an inflation 12
- 13 adjusted basis by 43.3 percent. Are you aware
- of that? 14
- 15 MS. LUTZ:
- A. Yes. 16
- 17 MR. O'BRIEN:
- 18 Q. And is that above and beyond what you'd expect
- 19 to see - I guess, it is above and beyond what
- you'd expect to see for inflation. In terms 20
- of your role in the Finance Department, what 21
- 22 sort of role do you have for oversight over
- the salary piece? 23
- 24 MS. LUTZ:
- A. I think yesterday I mentioned the salary 25

- 9 MS. RUSSELL:
- A. Which years again are you talking about? 10
- 11 MR. O'BRIEN:
- O. 2013 to 2014. 12
- 13 MS. RUSSELL:
- 14 A. I think with respect to the variance there,
- the HR panel discussed the reasons why, and 15
- when you're looking at the increase, you need 16
- 17 to look at the drivers that's causing the
- increase. You can't just look at the overall 18
- 19 percentage. There are reasons that are
- driving that, workforce requirements, and
- 20
- other things which the HR panel talked about, 21
- 22 progression, salary progression. So to make a
- blanket statement that the cost by percentage, 23
- 24 you really have to look at the details behind
- that which the HR panel would have provided. 25

Multi-Page TM November 17, 2015 NL Hydro GRA Page 9 Page 11 the number of vacancies that were included in Q. So it's not something the Finance panel or any 2 the -2 of you on the panel would have had any input 3 MR. O'BRIEN: in? 3 Q. The number of vacancies that were included. 4 MS. RUSSELL: A. We would just build up the numbers, and again 5 MS. LUTZ: 5 A. In 2014 test year? as we talked about how the budgets are done, 6 7 MR. O'BRIEN: facilitate the discussions and everybody would 7 come in and put forward the costs. There would Q. Right. 8 be discussion on each particular item. 9 MS. LUTZ: A. Yes. 10 MR. O'BRIEN: 10 Q. And to provide the actual experience, the 12 12 actual number of vacancies for that year? managed or decreased before the test year was 13 13 put in? 14 MS. LUTZ: 14 A. Yes, we could get that information. 15 MS. RUSSELL: 15 16 MR. O'BRIEN: A. I do recall discussions about the FTE Q. You can provide that, and, I guess, the final complement, like, the looking at - it would 17 17 part of that would be to provide the impact have been discussed, like, the number of FTEs 18 18 between the actual and what was included, can that different groups would have been putting 19 19 forward and the work plan, and those types of you provide that? 20 20 discussions, the work versus the FTE-21 MS. LUTZ: 21 22 A. Yes. 22 MR. O'BRIEN: 23 Q. And anything in detail that you can give us or 23 MS. GLYNN: is it just a generality? Q. Noted on the record. 25 MS. RUSSELL: 25 MR. O'BRIEN: Page 10 Page 12 Q. If we look back up here at 307, NP-NLH-307, we A. No, just a -1 look at the difference between 2014 test year 2 2 MR. O'BRIEN: to 2015 test year. Again, I guess, Ms. 3 3 Q. Yeah. I wonder if we can pull up NP-NLH-310. Russell, the same question with respect to -I want to just briefly talk about vacancies 4 4 5 we see a big change there from 81.9 million in 5 here where we were talking about that earlier. the 2014 test year to the 2015 test year. In this table, you were asked to - Hydro was 6 6 7 Would there have been any discussion you were 7 asked to provide vacancies from 2007 to 2014 a part of as to whether or not that was 8 actual and forecast. If we could scroll down, 8 reasonable? and I understand as you said, Ms. Lutz, the 9 2015 vacancy adjustment is in at 40. The 10 MS. RUSSELL: 10 11 A. Again we would have provided the numbers, we 11 actual vacancy adjustments or actual vacancies would have looked at that and facilitated the in terms of experience, the last few years 12 12 were 52, 51, and 52. On what basis was Hydro 13 discussions with Mr. Henderson on the drivers, 13 what was driving those numbers. considering 40 to be a reasonable number? 14 14 15 MR. O'BRIEN: 15 (9:15 a.m.) 16 MS. LUTZ: o. Okay. 16 17 MS. RUSSELL: 17 A. The 40 vacancies was determined by the Human A. So there would have been again some Resources Department based on their assessment 18 18 19 progression, which the HR panel has discussed of the workforce planning activities, and I 19 believe Mr. McDonald and Mr. Roberts testified 20

testimony, was 65 for the end of this year, is that right? MS.LUTZ: A. I believe that's what Mr. McDonald said. MR. O'RRIEN: O Q. Does Hydro intend to amend the 2015 test year to reflect that? MR. O'RRIEN: O Q. And why is that? MR. O'RRIEN: O Q. And how would and Mr. Roberts the service, and they feel that that was the reasonable number of staff that were required, and 40 was reflective of what the vacancy would be. MR. O'RRIEN: O Q. And how would you square that with the 2015 cost recovery application? Is there an extra 25: 25 vacancies still included in that cost Page 14 recovery request for 2015? MR. O'RRIEN: A And without the staff, the work is being accomplished through overtime or through consultants and so on. So it doesn't necessarily translate into the fact that because those positions are vacant, that we had the number was suggest, in terms of that 25? MR. RUSSELL: A So the 40 is the number that is in the test of the vacancy and again I'll have to go back to Mr. McDonald's testimony because he explained the reasoning for the variances in the vacancy rate and why he felt the 40 was rejustified and the number that they were working towards for 2015. MR. O'RRIEN: MR. O'RRIEN: MR. O'RRIEN: MR. O'RRIEN: A MR. O'RRIEN: A MR. O'RRIEN: A And without the staff, the work is being accomplished through overtime or through consultants and so on. 2 MS RUSSELL: 3 Ms. CURSELL: 4 MS. LUTZ: 5 A. I believe that's what Mr. McDonald said. 6 MR. O'RRIEN: 7 Q. Does Hydro intend to amend the 2015 test year to reflect that? 9 MS. LUTZ: 10 A. No, we do not. 11 MR. O'RRIEN: 12 Q. And why is that? 13 MS. LUTZ: 14 A. I believe as Mr. McDonald and Mr. Roberts testified, the workforce planning requirements is are what is required for the future to provide 17 the service, and they feel that that was the reasonable number of staff that were required, and 40 was reflective of what the vacancy would be. 2 Q. And how would you square that with the 2015 23 cost recovery application? Is there an extra 2 25 vacancies still included in that cost 15 recovery request for 2015? 2 MS. RUSSELL: 3 A. We'd have to get the new estimate for the 11 vacancy of the -so the reason that we had the number of staff that were required, and 40 was reflective of what the vacancy 20 would be. 2 Q. And how would you square that with the 2015 23 cost recovery application? Is there an extra 2 25 vacancies still included in that cost Page 14 recovery request for 2015? 2 MS. RUSSELL: 3 A. We'n you say 25, you mean the difference, you're talking about the difference, you're talking to have the you're talking about the difference, you're talking about the difference, you're talk	1 - or the forecast now as of Mr. McDor	- 1	-
that right? 4 MS, LUTZ. 5 A. I believe that's what Mr. McDonald said. 6 MR, O'BRIEN: 7 O, Does Hydro intend to amend the 2015 test year to reflect that? 9 MS, LUTZ. 10 A. No, we do not. 11 MR, O'BRIEN: 12 Q, And why is that? 13 MS, LUTZ. 14 A I believe as Mr. McDonald and Mr. Roberts testified, the workforce planning requirements are what is required for the future to provide the service, and they feel that that was the reasonable number of staff that were required, and 40 was reflective of what the vacancy would be. 21 MR, O'BRIEN: 22 Q, And how would you square that with the 2015 cost recovery application? I sthere an extra 25 25 vacancies still included in that cost 25 vacancies still included in that cost 25 was made and you're asking for additional costs. I would you squase that why the felt that were required, and right now you're asking in your 2015 cost recovery application for costs in 2015 and you're asking for additional costs. I would you suggest, in terms of that 25? 11 MS, RUSSELL: 12 A. So the 40 is the number that's in the test year number was pained the reasoning for the variances in the teex cancey rate and why he felt the 40 was reflective in that the were working towards for 2015. 8 MR, O'BRIEN: 10 A. We'd have to get the new estimate for the 11 vacancy at his point. 12 MR, O'BRIEN: 13 Q, Okay. 14 MS, LUTZ: 15 A. But some of the - so the reason that we had the number of positions was to perform work throughout Hydro. 15 MR, O'BRIEN: 16 Q, Veak, HAM, O'BRIEN: 17 Q, Rod was reflective of what the vacancy would be working work and 40 was reflective of what the cancy are and distinct the cost are a savings, if you will, and you can see that by the fact that 25 what had you can see that by the fact that 25 which the est year number was. 18 MR, O'BRIEN: 19 Q, Right. 20 Q, And how would be working will be an appropriate figure. 21 A. So the 40 is the number that they were working toward, I believe the work in the test year number was. 22 Work MCBRIEN: 23 A. So the 40 is	2 testimony, was 65 for the end of this year	ar, is 2	•
4 MR. O'BRIEN: 5 A. I believe that's what Mr. McDonald said. 6 MR. O'BRIEN: 7 Q. Does Hydro intend to amend the 2015 test year to reflect that? 9 MS. LUTZ: 10 A. No, we do not. 11 MR. O'BRIEN: 12 Q. And why is that? 13 MS. LUTZ: 14 A. I believe as Mr. McDonald and Mr. Roberts testified, the workforce planning requirements are what is required for the future to provide the service, and they feel that that was the reasonable number of staff that were required, and 40 was reflective of what the vacancy would be. 21 Q. And how would you square that with the 2015 23 Cost recovery application? Is there an extra 25 25 vacancies still included in that cost Page 14 1 recovery request for 2015? 2 MS. RUSSELL: 2 MS. O'BRIEN: 3 A. When you say 25, you mean the difference, you're talking about the difference - 5 MR. O'BRIEN: 3 A. When you say 25, you mean the difference, you're talking about the difference, and right now you're asking for additional costs, I would you re asking for additional costs, I would you re asking for additional costs, I would sugaest, in terms of that 25? 13 MS. RUSSELL: 2 A. So the 40 is the number that sin the test year for vacancy, and again I'll have togo built into that cost the service, and they be felt that was the the vacancy and again I'll have togo built into that cost the service, and they be felt the twee requirements that the were working towards for 2015. 3 MS. I believe as Mr. McDonald and Mr. Roberts testified, the workforce planning requirements are what is required for the future to provide the service, and they feel that that was the reasonable number of staff that were required, and 40 was reflective of what the vacancy would be. 15 C. A. Mr. O'BRIEN: 16 Q. And how would you square that with the 2015 cost recovery application? Yeah, there's an adjustment for 40 in there, and right now you're asking for additional costs, I would suggest, in terms of that 25? 11 MS. RISSELI: 12 A. So the 40 is the number that's in the test year for vacancy, and again I'll have to go back to Mr. McDonald's testimony because he coxplained the reasoning for the variances in the vacancy rate and why he felt the 40 was 17 justified and the number that they were working towards for 2015. 19 MR. O'BRIEN: 20 Q. I understand that, and in terms of going for for vacancy, and again I'll have to go that for 2016, say, that you would be working with a 40, and he believed you'd be able to meet that 40 vacancy as opposed to the 65 in 24 meet that 40 vacancy as opposed to the 65 in 24 meet that 40 vacancy as opposed to the 65 in 24 meet that 40 vacancy as opposed to the 65 in 24 meet that 40 vacancy as opposed to the 65 in 24 meet that 40 vacancy as opposed to the 65 in 24 meet that 40 vacancy as opposed to the 65 in 24 meet that 40 vacancy as opposed to the 65 in 24 meet that 40 vacancy as opposed to the 65 in 24 meet that 40 vacancy as opposed to the 65 in 24 meet that 40 vacancy as opposed to the 65 in 24 meet that 40 vacancy as opposed to the 65 in 24 meet that 40 vacancy as opposed to the 65 in 25 meet t

I believe as Mr. McDonald and Mr. Roberts 15 testified, the workforce planning requirements 16 are what is required for the future to provide 17 the service, and they feel that that was the 18 reasonable number of staff that were required, 19 and 40 was reflective of what the vacancy 20 would be. 21 MR. O'BRIEN: 22 Q. And how would you square that with the 2015 23 cost recovery application? Is there an extra 24 25 - is there an adjustment now for an extra 25 25 vacancies still included in that cost Page 14 1 recovery request for 2015? 2 MS. RUSSELL: 3 A. When you say 25, you mean the difference - 4 you're talking about the difference - 5 MR. O'BRIEN: 6 Q. Yeah, there's an adjustment for 40 in there, 2 and right now you're asking in your 2015 cost 8 recovery application for costs in 2015 and 9 you're asking for additional costs, I would 10 suggest, in terms of that 25? 11 MS. RUSSELL: 2 A. So the 40 is the number that 's in the test 12 year for vacancy, and again I'll have to go 14 back to Mr. McDonald's testimony because he 15 explained the reasoning for the vacancy has powed to the 65 in 16 the vacancy arte and why he felt the 40 was 17 justified and the number that they were 18 working towards for 2015. 19 MR. O'BRIEN: 20 Q. I understand that, and in terms of going 21 forward, I believe this testimony suggested 22 that for 2016, say, that you would be working 23 with a 40, and he believed you'd be able to 24 neet that 40 vacancy so opposed to the 65 in 24 neet that 40 vacancy as opposed to the 65 in 25 pistified and the reason that we had 26 the number of positions was to perform work 27 throughout Hydro. 28 MR O'BRIEN: 29 Q. Q. So in a non-GRA year, your expectation would 1 2 be that there'd be less need for interaction 3 with Mr. Sturge? Would that be right? 4 MS. RUSSELL: A. Well, I think now just due to the change in 5 the reporting structure now. 6 7 JOHNSON, Q.C.: Q. Right. 8

9 MS. RUSSELL: A. Like where Mr. MacIsaac is there and I don't 11 report to Mr. Sturge any more, so with respect to Mr. Sturge, that may change, but even with 12

November 17, 2015 Page 137 Page 139 A. No, we have -- in each region, we have a site expected that there were some things out there 1 1 2 service administrator, a team lead site 2 that we could be looking at in terms of benchmarking, to get a sense of labour services, and that particular individual is 3 3

basically the person in the operations group 4 that would -- they're actually based in the 5

region and they would participate in variance 6

7 analysis, compilation of budgets, forecasts,

that type of thing. 8

9 JOHNSON, O.C.:

Q. Yeah. And in the case of the individual at 10 the Bishop Falls operation, he would report to 11

15 JOHNSON, O.C.:

Page 138

24

1 JOHNSON, Q.C.: Q. Okay, okay. So if you go back down through 2

this undertaking, if we could just start up to

the top for a bit, you know, and -- come down 4 5

a little bit further, Ms. Gray, sorry. So

here we see all of the various positions that 6

7 have been added, the change from 2013 actual

to 2014 test year. So that takes up the first 8

9 part and they're broken down by engineering and operations and executive admin. So this 10

is where the Board could look to to see what's

been added and where they've been added.

Now I asked when on -- about labour 13 productivity back on September 23rd. I asked 14

Mr. Henderson if he believed that Hydro had

good labour productivity and I just wanted to 16 17

put something to the panel for a moment, and

I'll give you the background on it, and just 18 19 for the record, I asked him that on page 153.

And he indicated that since he had been in the 20

role and he had, of course, started that role 21

22 I think in April 2013, but since he had been

in that role, he had not done any benchmarking 23

in that regard, and he told us that he wasn't 24 25

sure what benchmarking was out there, but he

4

productivity.

And I'd just ask this panel, are any of 5 you aware of what measures are out there to 6

assess Hydro's labour productivity?

8 MS. LUTZ:

7

A. I'm not.

10 MS. RUSSELL:

A. I wouldn't be aware specifically. 11

12 MR. PELLEY:

A. From my perspective, that's outside my area.

14 JOHNSON, Q.C.:

Q. Okay. So if there was a request made say by 15 16 the person running operations, okay, that we

need to have some insights into labour 17

productivity, your department wouldn't be 18 19

involved in that. Who would be tasked with

that? 20

21 MS. RUSSELL:

22 A. On labour productivity, I'm -- I can't -- I'm

not for sure. I'm not sure if maybe the Vice 23

President of HR would be involved in some of

those discussions. 25

Page 140 1 JOHNSON, Q.C.:

Q. Okay. I also discussed with Mr. Henderson on

that same date, a few pages later, page 156 3 for the record, that I had pointed out to him, 4

5 and of course, he was aware of the reference

that the Public Utilities Board back in 2001 6

7 in a GRA order, they had said that there was

an onus on Hydro to bring forward performance 8 measures which -- and I'm quoting -- "which 9

clearly demonstrate the efficiency of its

10 operations." Okay. And as a finance panel of 11

Hydro, do you -- what type of -- do you have 12

any knowledge of what type of performance 13

measures the Board should be looking to to 14

have an insight on the efficiency of Hydro's 15

operations? Would that be a fair question for

this panel? 17

18 MS. RUSSELL:

16

A. Well, we could only speak to -- like we put 19 forward the operating costs as one of the 20

measures to follow. From the financial point 21

of view, we have spoken to the metrics or the 22

things that we look at in finance, the 23

operating, the net income, the cash flow. 24 Those areas would be what we could, you know, 25

have -- let's just say there was a hundred,

for arguments sake. Mr. Moore, as general

manager of TRO, he might own let's say 30 of

those, and so while you're correct that each

individual of the 30 might not know what

everybody is doing, the person out in that

annual cost variance threshold of plus or minus 500,000 with variances up to that amount to be borne by Hydro and amounts in excess to be deferred in this account." And then he refers to the amended application and he notes that this deferral proposal differs from the original GRA.

He goes on to say then in the paragraph under that, "under this new energy supply cost variance deferral, any increase or decrease in test year energy supply for the Island Interconnected system would be stabilized at a value calculated as the difference between the test year cost of that supply and the test year No. 6 fuel cost of supply." He notes that this deferral would cover both variations in quantity and variations in price, et cetera.

Then he goes on to say "this would further shift business risk that Hydro now faces in planning for and acquiring needed power resources to Hydro's customers. When such risk shifting is permitted by regulators, it is appropriately accompanied by offsetting changes to the utility's allowed equity

So, yes, this is the first GRA since test year conversion factor, which is 630, that time. 15 15 16 right, that was set a number of years ago? 16 JOHNSON, Q.C.: 17 MS. RUSSELL: Q. Right, and would you agree with me that if 17 Hydro had come in and got a rebalancing of -A. Yes. 18 I'm calling it a rebalancing, but a new fuel 19 JOHNSON, O.C.: 19 conversion rate built into its rates, it Q. The last GRA, and we see that the actual fuel 20 20 conversion has not kept pace over that period wouldn't have had to face the year by year 21 21 of time. So we see the impact on Hydro's 22 22 losses to the extent that it has because it financial loss or financial impact on Hydro of got set at a fairly high amount several years 23 23 2.4 million in '09, 4.9 million in 2010, 3.5 ago and then nothing was done about it, right? 24 million in 2011, and on and on it goes. So the delays were - I mean, there were a lot of different reasons 10 fairer way to deal with this from the 10 for the delays. There was RSP process, there customer's point of view than just saying, 11 11 was some rates policy issues, there were lots look, this is your risk from here on out? 12 12 of different things that caused the delay, but 13 MR. Well, I mean, the fact of the matter is that 17 17 you raised the point about a potential for a for 40 odd years you've not looked or Hydro 18 18 two to three year cycle, but I think that has not looked to shift the full risk onto 19 19 doesn't change the fact that we're dealing in customers, and now it is, and I'm wondering 20 20 whether Hydro would agree with me that a way the near term, Hydro still is exposed to 21 21 to - if Hydro views this as a risk, a way to significant losses and that deferral account 22 22 mitigate this risk is to have more frequent we view as important in the interim until we 23 23

GRA filings?

Q. Right, and that - agreeing to come in every two or three years for a GRA, that to some 5 degree removes the need for this risk shifting 6

7 mechanism to customers, doesn't it?

8 MS. RUSSELL:

A. So I would agree with the point about the two to three years. In this GRA, we're not asking 10 to recoup the costs in between those - we're 11 not asking to recoup the cost on that chart in 12 between there. We're asking from a go forward 13 14 basis.

15 JOHNSON, Q.C.:

O. Oh, I understand that, I understand that.

17 MR. PELLEY:

25

A. Could you perhaps just ask the question again? 19 JOHNSON, Q.C.:

Q. Isn't the answer - like, customers are looking 20 at this and saying, hold on now, we haven't 21 had this risk ever. Now Hydro is coming in and 22 saying we want to put this risk on you, and 23 what I'm suggesting to you is that the better 24

solution for customers at least would be for

Page 164 you is a fair way to deal with variability of 1

that nature on a go forward basis.

3 JOHNSON, Q.C.:

Q. Well, you know, Hydro, as I understand it, is 4 committed to filing its next GRA by no later 5

hit that two to three year cycle on a go

forward basis, which I completely agree with

than March 31st, 2017, right? 6

7 MS. RUSSELL:

A. Yes.

9 JOHNSON, Q.C.:

Q. So, you know, in all honesty, in light of that, is there a compelling need for the Board 11 to be petitioned to set up yet another 12 deferral account?

13

14 MS. RUSSELL:

A. Yes, there is because this is a cost from the 15 period between now and the next GRA. This is 16 a real cost to providing service for customers 17 and it's an uncontrollable cost that should be 18 19 recovered.

20 MR. PELLEY:

21
