

**Newfoundland Labrador Hydro (NLH)  
Supply and Demand Status Report Filed Wednesday, February 15, 2017**

**Section 1  
Island Interconnected System Supply and Demand  
Actual 24 Hour System Performance For Tuesday, February 14, 2017**

**Supply Notes For February 14, 2017** <sup>1,2</sup>

- A** As of 1556 hours, January 20, 2017, Holyrood Unit 2 available at 150 MW (170 MW).
- B** As of 1425 hours, February 06, 2017, Hardwoods Gas Turbine unavailable (50 MW).
- C** As of 2006 hours, February 06, 2017, Holyrood Unit 1 available at 150 MW (170 MW).
- D** As of 1513 hours, February 09, 2017, Stephenville Gas Turbine available at 38 MW (50 MW).
- E** At 1645 hours, February 14, 2017, Holyrood Combustion Turbine available (123.5 MW).

**Section 2  
Island Interconnected Supply and Demand**

| Wed, Feb 15, 2017                            | Island System Outlook <sup>3</sup> | Seven-Day Forecast           | Temperature (°C) |         | Island System Daily Peak Demand (MW) |                       |
|--|------------------------------------|------------------------------|------------------|---------|--------------------------------------|-----------------------|
|  |                                    |                              | Morning          | Evening | Forecast                             | Adjusted <sup>7</sup> |
| Available Island System Supply: <sup>3</sup> | <b>1,895</b> MW                    | Wednesday, February 15, 2017 | 0                | 0       | <b>1,445</b>                         | <b>1,337</b>          |
| NLH Generation: <sup>4</sup>                 | 1,590 MW                           | Thursday, February 16, 2017  | -3               | 0       | 1,420                                | 1,312                 |
| NLH Power Purchases: <sup>5</sup>            | 125 MW                             | Friday, February 17, 2017    | 0                | -2      | 1,410                                | 1,303                 |
| Other Island Generation:                     | 180 MW                             | Saturday, February 18, 2017  | -2               | -4      | 1,440                                | 1,332                 |
| Current St. John's Temperature:              | -1 °C                              | Sunday, February 19, 2017    | -3               | -3      | 1,340                                | 1,233                 |
| Current St. John's Windchill:                | -9 °C                              | Monday, February 20, 2017    | -5               | -3      | 1,450                                | 1,342                 |
| 7-Day Island Peak Demand Forecast:           | <b>1,475</b> MW                    | Tuesday, February 21, 2017   | -4               | -6      | 1,475                                | 1,367                 |

**Supply Notes For February 15, 2017** <sup>3</sup>

- Notes:
- Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.
  - Due to the Island Interconnected System being isolated from the larger North American grid, when there is a sudden loss of large generating units some customer's load must be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding, is necessary to ensure the integrity and reliability of system equipment. Under frequency events typically occur 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes.
  - As of 0800 Hours.
  - Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).
  - Gross output from all Island sources (including Note 4).
  - NLH Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Vale capacity assistance (when applicable), and Wind Generation.
  - Adjusted for CBP&P, Praxair and Vale interruptible load as well as the impact of voltage reduction, when applicable.

**Section 3  
Island Peak Demand Information  
Previous Day Actual Peak and Current Day Forecast Peak**

|                   |  |       |          |
|-------------------|--|-------|----------|
| Tue, Feb 14, 2017 | Actual Island Peak Demand <sup>8</sup> | 11:50 | 1,535 MW |
| Wed, Feb 15, 2017 | Forecast Island Peak Demand            |       | 1,445 MW |

- Notes: <sup>8</sup> Island Demand is supplied by NLH generation and purchases, plus generation owned and operated by Newfoundland Power and Corner Brook Pulp & Paper (Deer Lake Power, DLP).
