

## Newfoundland Labrador Hydro (NLH) Supply and Demand Status Report Filed Monday, February 24, 2020

### Section 1

#### Island Interconnected System Supply, Demand & Exports Actual 24 Hour System Performance For Saturday, February 22, 2020

#### Supply Notes For February 22, 2020

1,2

A At 2300 hours, February 22, 2020, Holyrood Unit 3 available at full capacity (150 MW).

### Section 2

#### Island Interconnected Supply and Demand

| Sun, Feb 23, 2020                            | Island System Outlook <sup>3</sup> |       |  | Seven-Day Forecast           | Temperature (°C) |         | Island System Daily Peak Demand (MW) |                       |
|--|------------------------------------|-------|--|------------------------------|------------------|---------|--------------------------------------|-----------------------|
|  |                                    |       |  |                              | Morning          | Evening | Forecast                             | Adjusted <sup>7</sup> |
| Available Island System Supply: <sup>5</sup> | 2,125                              | MW    |  | Sunday, February 23, 2020    | -2               | -2      | 1,320                                | 1,217                 |
| NLH Island Generation: <sup>4</sup>          | 1,695                              | MW    |  | Monday, February 24, 2020    | -6               | -2      | 1,435                                | 1,330                 |
| NLH Island Power Purchases: <sup>6</sup>     | 125                                | MW    |  | Tuesday, February 25, 2020   | 1                | 0       | 1,260                                | 1,157                 |
| Other Island Generation:                     | 205                                | MW    |  | Wednesday, February 26, 2020 | -2               | -5      | 1,400                                | 1,296                 |
| ML/LIL Imports:                              | 100                                | MW    |  | Thursday, February 27, 2020  | -8               | -4      | 1,555                                | 1,449                 |
| Current St. John's Temperature & Windchill:  | -2 °C                              | -8 °C |  | Friday, February 28, 2020    | -1               | 1       | 1,405                                | 1,301                 |
| 7-Day Island Peak Demand Forecast:           | 1,555                              | MW    |  | Saturday, February 29, 2020  | 0                | -2      | 1,315                                | 1,212                 |

#### Supply Notes For February 23, 2020

3

- Notes:
1. Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.
  2. Due to the Island system having no synchronous connections to the larger North American grid, when there is a sudden loss of large generating units there may be a requirement for some customer's load to be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding (UFLS), is necessary to ensure the integrity and reliability of system equipment. Under frequency events have typically occurred 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes. With the activation of the Maritime Link frequency controller during the winter of 2018, UFLS events have occurred less frequently.
  3. As of 0800 Hours.
  4. Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).
  5. Gross output from all Island sources (including Note 4).
  6. NLH Island Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Wind Generation and capacity assistance (when applicable).
  7. Adjusted for curtailable load, market activities and the impact of voltage reduction when applicable.

### Section 3

#### Island Peak Demand Information Previous Day Actual Peak and Current Day Forecast Peak

|                   |  |       |          |
|-------------------|--|-------|----------|
| Sat, Feb 22, 2020 | Actual Island Peak Demand <sup>8</sup> | 07:35 | 1,516 MW |
| Sun, Feb 23, 2020 | Forecast Island Peak Demand            |       | 1,320 MW |

Notes: 8. Island Demand / LIL / ML Exports (where applicable) is supplied by NLH generation and purchases, plus generation owned and operated by Newfoundland Power and Corner Brook Pulp & Paper (Deer Lake Power, DLP).
