Request for Information

Evidence of C. Douglas Bowman, October 14, 2016 (C. Douglas Bowman Evidence”)

NP-CA-001 Reference: C. Douglas Bowman Evidence, Page 4, Lines 6-13;

Mr. Bowman states:

“I recommend that the Board bring this investigation to a close and direct its attention to high priority items including the reliability and adequacy of supply pre-Muskrat Falls, the regulatory requirements associated with sales and purchases of capacity and energy over the Maritime Link, and the rates and regulatory treatment of costs associated with Muskrat Falls and its associated transmission. The investigation is not necessary to address these high priority issues – they can all be adequately addressed through the normal regulatory process.”

Please provide an overview of the type of regulatory process Mr. Bowman would propose to the Board to address the issue of reliability on the Island Interconnected System after the interconnection with Muskrat Falls.

RESPECTFULLY SUBMITTED at St. John’s, Newfoundland and Labrador, this 4th day of November, 2016.
