

1 Q. **Re: Volume II, Tab 12 – Install Asset Health Monitoring System – Upper Salmon**  
2 **Generating Plant**

3 How often is data collected presently from the Upper Salmon Generating Plant?

4

5

6 A. Data is currently collected manually when operators are on site. Site visits can vary  
7 from two to four days per week subject to weather conditions and situations that  
8 arise at three other sites for which the operators are responsible.
