

1 Q. With respect to Appendix “E” to the Application – the Net Metering Interconnection
2 Agreement, in addition to the Interconnection Agreement, will there also be a
3 commercial agreement to cover sales by the customer to Hydro?
4

5

6

7 A. There will be no additional commercial agreement to cover sales by the customer
8 to Hydro. The purchase of any net excess generation credits by Hydro will be
9 governed by the Net Metering Program that will be included in Hydro’s Schedule of
10 Rules, Rates and Regulations. As indicated in Hydro’s Application, at each Annual
11 Review Date, any net excess generation credits on the customer’s account will be
12 set to zero and any unused energy credits will be purchased by Hydro through a
13 billing credit applying to the customer’s bill, and not a separate commercial
14 agreement.

15

16 Further, the objective of the Net Metering Program is to provide customers with
17 the means to produce renewable energy for their own consumption, not to produce
18 renewable energy for sale. In order to be eligible for the program, installed net-
19 metering generation systems are not to be sized beyond a customer’s own load
requirements.
