

1 Q. Reference: Hydro's 2016 Standby Fuel Deferral Application, February 5, 2016, Page

2 1. Hydro states:

3

4 *"As a result of the fourth lowest inflows in 65 years, Hydro has proactively increased*
5 *its level of thermal production."*

6

7 Please provide a table showing (i) instances where Hydro proactively increased its
8 level of thermal production for hydraulic reservoir support and (ii) the amount of
9 increased thermal production, in GWh, that was produced in each instance.

10

11

12 A. Hydro does not maintain specific records of when thermal production has been
13 used to supplement hydroelectric generation during times of low inflows and low
14 reservoir levels.
