

1 Q. **Bay D'Espoir Expansion**

2 Please comment, based on Hydro's most recent information and assessments, on
3 what impact the addition of 154.4 MW of capacity to the Island Interconnected
4 System by a new Bay D'Espoir turbine, would have on the need to maintain
5 Holyrood Plant standby generation (and possibly base loading) functions from 2022
6 onwards, if the new Bay D'Espoir turbine were to be brought into full service by the
7 end of 2021?

8

9

10 A. There is no planned generation from the Holyrood Plant from 2022 onwards.
11 Should it be deemed to be required, a new Bay d'Espoir turbine brought into full
12 service by the end of 2021 would not impact the plans for the Holyrood Plant.
