

1 Q. In its planning studies, how, and on what basis, does Hydro value lost load; e.g., unsupplied
2 energy?

3

4

5 A. Newfoundland and Labrador Hydro does not currently place a specific value on unsupplied
6 energy in its planning studies and will dispatch all available resources to meet system load and
7 reserve requirements in a given hour. Resources are typically dispatched in order of economic
8 priority.
