	1	Q.	Reference: Reliability and Resource Adequacy Study – 2019 Update, November 15, 2019,
	2		Volume III: Long-Term Resource Plan, Section 7.2.6 – Assessment of the LIL Bipole Outage
	3		Scenario.
4	4		Hydro provides three visuals (Figures 4, 5, and 6) that show the exposure for unserved energy if
ļ	5		the outage were to occur on the peak day in the test year, for three weeks at the period of
(6		highest annual demand requirements, and the load duration curve for the same period,
	7		respectively. Please provide the data used to produce these figures in Microsoft Excel format.
	8		
	9		
1	0	A.	Please refer to NP-NLH-036, Attachment 1, provided as an Excel file, for the data used to
1	1		produce Figures 4, 5, and 6.
