

1 Q. Schedule 2, page 2, Clause 1 of the Terms and Conditions. Is it appropriate that this statement  
2 only address that the energy may be interrupted at any time to deal with system constraints?  
3 Does Hydro have the discretion to simply not provide this energy? Please explain.

4

5

6 A. Please refer to Newfoundland and Labrador Hydro's ("Hydro") response to PUB-NLH-009 of this  
7 proceeding for additional information regarding Hydro's intentions with respect to the  
8 interruption of non-firm service. While Hydro has the discretion to not provide non-firm energy,  
9 it is Hydro's intent to provide energy as long as there are no system constraints or emergency  
10 conditions preventing energy delivery.
