Bay d'Espoir Penstock 1 Section Replacement and Weld Refurbishment Page 1 of 1

What cumulative effect does the refurbishment of the welds have on the heat affected zone and 1 Q. 2 what impact, if any, does this have on the probability of future failure? 3 4 During weld refurbishment, the new weld largely replaces the existing heat-affected zone, while 5 A. 6 a new heat-affected zone is then created adjacent to the new weld. There is no cumulative 7 impact to the heat-affected zone that alters the probability of future failures.
